

Postdoc positions

Postdoc positions are available at the Dr. Yu Fengwei's group in **Temasek Life Sciences Laboratory (TLL)**, Singapore. TLL is a world-class research institute which undertakes the cutting-edge research in molecular biology and genetics utilizing a broad range of model organisms.

Dr Yu is a Senior Principal Investigator at TLL and also the President of Society for Neuroscience Singapore Chapter (SfN Singapore). The Yu group is interested in understanding molecular and cellular mechanisms of neuronal development, pruning and neuro-degenerative disease using a simple and powerful model organism, *Drosophila*. Dr Yu has published many important papers in *Nature Neuroscience*, *Neuron*, *Developmental Cell*, *PLOS Biology*, *Nature Cell Biology*, *Development* and *Journal of Neuroscience*.

The successful candidates are expected to be highly motivated and have strong curiosity in developmental cell Biology, neurobiology and genetics, to pursue an integrated approach involving advanced genetic, molecular, cellular and biochemical methodologies. One first-author research paper in an internationally recognized peer-reviewed journal will be required. The life in Singapore is very convenient and safe!

Interested individuals may send your CV, publications, research summary and three recommendation letters to:
